

SUNDERØY

Type: Freezing stern trawler

Hull material: Steel

Owner: Prestfjord Seafood A/S (Norway)

One of world's most advanced fishing vessels, this modern stern trawler is arranged with triple trawl and pelagic trawl for catching white fish and shrimps on Arctic waters. Designed with a special focus on gentle fish handling and optimized for bottom and mid-water trawling, the vessel is equipped with modern and automated fish processing equipment, including a meal plant, and a total hold capacity of 2250 m³. As achieving a minimal environmental footprint is a key factor, this state of the art trawler introduces a wave piercing hull design and a hybrid propulsion system, reducing the vessel's impact on the environment.
